

OUR MISSION

Our mission is to graduate all students prepared for success in higher learning. We are committed to fostering a culture that is based on positive relationships for all stakeholders and providing rigorous instruction through innovative teaching practices.

OUR VISION

Through the national P-TECH model, students will start their health care pathway and post-secondary education in the ninth grade and will graduate with a high school diploma and an Associates of Science degree from San Antonio College, as well as an industry-based certification. Business and community partners lead by Metropolitan Methodist Health System and University Health System will support the outcome driven program through advisory, work-based learning experiences and a pipeline development that will focus on technical and essential skills to be successful in a nursing or healthcare career. By offering a college preparatory curriculum that includes real-world experiences and internship opportunities, students will gain the knowledge and skills necessary for a successful post-secondary journey toward a career the healthcare field.
