

H-TECH COMMUNICATON PLAN

It is the goal of Fox Tech's H-TECH to provide underrepresented students the ability to obtain an Associates of Science at no cost to the students and their families. The program encompasses the following:

- Earn an Associate's degree or up to 60 hours of college credit tuition-free while in high school
- Eliminate thousands of dollars in college tuition costs
- Earn an industry-based certification in addition to the Associate of Science degree
- Opportunity to enter the job market with industry-ready skills upon completion of high school
- Experience higher-level education with the benefit of high school support systems
- Access to cutting edge medical technology and hands-on learning
- Access to industry professionals as mentors

San Antonio ISD hosts several events through-out the course of the year to communicate the benefits of the H-TECH Program. These events have included:

- Regularly scheduled parent nights at Fox Tech High School in both the fall and spring semesters. Representatives from the H-TECH program will be on site and work to communicate with parents and students.
- Multiple parent nights at various San Antonio ISD middle schools throughout the district. Representatives from H-TECH attend and speak with the parents and students the benefits and offerings of Fox Tech's H-TECH program.
- Information about the H-TECH program is placed on the Fox Tech High School website for students and parents.
- Fox Tech's H-TECH staff will attend several district events throughout the year in order to inform potential students and parents and explain the aspects of the H-TECH program. H-TECH works with industry partners to provide opportunities for both parents and students to visit and learn about the aspects of the program. During these events representatives are available to answer questions and inform parents about the program.
