

Construction Science P-TECH Mission and Vision

Mission:

Constructing and empowering leaders who command their futures by embracing a growth mindset through work based learning.

Vision:

The Construction Science P-TECH at Sidney Lanier High School is committed to constructing and empowering leaders with the skills, knowledge, and character to excel academically through a rigorous and innovative academic program. We embrace the hard work of maintaining a growth mindset within construction science management and power generation/alternative power programs through work based learning. We believe in teaching the whole student –mind, character, and body- because we are equipping leaders who will command their futures and serve their communities by being career ready.
