In response to the COVID-19 exceptional circumstances, the following multiple measures were created to determine college readiness in lieu of the TSI.

High School students registering will undergo an individual review by the College's High School Program (HSP) liaison and director to determine if Multiple Measures may be used for placement.

Courses requiring TSI, but do not include a college readiness standard, will be subject to individual review. For details, see Review Consideration.

Note: Subject to change

THECB has approved Multiple Measures for High School Programs (Summer 2020 and academic years 2020–2021 and 2021–2022).

A student may take the math online refresher in lieu of the documentation listed below to determine placement

* ISD counselors will submit the following to the College's High School Program (HSP) liaison for initial review:

- Standardized scores, any prior attempts on TSI Math or Reading/Writing if available, and a current high school transcript showing courses taken and test scores earned through Fall semester of 2019 or relevant previous semester.
- Recent grade report for Spring 2020 or relevant previous semester (final or progress report accepted)
- Multiple Measures are to be used for Math and English courses to meet TSI requirements.

If there is evidence of potential student success, HSP Director will determine final decision of student placement.
