

CYBER P-TECH USA with St. Philip's College

Our Mission

The mission of Cyber PTECH USA at Sam Houston High School with St. Philip's college is to create an environment of independent thinkers, problem solvers, and global learners. All students will master skills needed for high school completion while simultaneously earning college credits, industry certifications, and work base learning in high wage high demand career fields. Students will develop professional skills through mentoring, job shadowing, and internships in cybersecurity. Upon graduation students will have acquired the essential knowledge and skills to enter the workforce or continue on to a four year university or institution of higher learning.

Our Philosophy

We believe that for learning to take place, students need to be surrounded by committed, caring adults. "What is best for *this* student"? is the daily question guiding our teachers. We will strive to create an atmosphere of independent learning that involves students taking ownership of their learning and teachers creating the spaces for collaboration, creativity, and authentic learning.

Our Slogan

#WearetheBest #WearetheBrightest #WearetheFirst
