P3 Campus is an anonymous tip reporting solution developed specifically for K-12 schools. Our proven technology meets all the requirements of David's Law and a number of Texas school districts are already using P3 Campus. P3 Campus is a vital tool in keeping schools and students safe. School community members report about a wide range of concerns – from bullying - to suicide threats - to threats of violence, through our P3 Campus mobile app or through any web browser at P3 Campus.com.

Anderson Software, a local Texas company, has been developing anonymous tip management solutions for 19 years. We are a proud partner with the Safe2Tell program where our technology is used in every school in Colorado, Wyoming, and Nevada.

We believe that collaboration between peace officers, school administrators, and mental health professionals is vital in the prevention of tragedy. The relationship between these three forces can change the landscape of school safety. P3 Campus is the tool that facilitates these three groups of experts working together for improved school safety.

Our proven technology is used in thousands of schools, has highlighted students who need help, and has saved many lives. The technology is supplemented by student lessons, promotional materials, and deployment guides to have schools up and running quickly, receiving quality reports and managing reports effectively. P3 Campus will aid you in gathering the information you need to fully support and protect your students.
