

# PREP Alternative

## 2020 Prefreshman Engineering Program

PREP is a math-based summer program for students interested in science, technology, engineering, and math (STEM). It helps prepare participants for advance studies and careers in STEM. This year, we are excited to offer **PREP Alternative**, a free opportunity for learning to take place at home. Students in grades 6 through 8 may register to participate.

### Learning

Curriculum will focus on Logic and its application to Mathematics, Introduction to Engineering, and topics in problem solving. Materials and activities as well as opportunities to engage with instructors will be available on-line. Printed materials will be available to those without computer/internet access through registration.

### Dates

The program will take place **June 15th - July 30th**. A Parent Orientation will take place online prior; dates TBA.

### Cost

PREP Alternative is free to all.
