## NOVEMBER STEAM CHALLENGE DESIGN YOUR OWN LAWN TOOL

It's that time of the year again! The weather is changing, the days are getting shorter, and the leaves are falling!

Your challenge for this month is to create a lawn tool using recycled materials that will help your family manage all of the falling leaves! Maybe a rake or shovel will do! Or maybe you can get creative and invent a new tool. Try using the Engineering Design Process to help you along the way. And remember, send me a picture of your finished product when you are done so I can share it next month!

Have fun!

## FALL STEAM RECAP AT YWLAP

Wow! What a whirlwind the fall has been here at YWLAP! So many fun events have been happening on campus. We kicked off the spooky season celebration with HallowSTEAM where students worked together with their classes to create characters from a spooky storybook. Then we introduced the STEAM Fair project for our 2nd and 3rd graders that will take place in May of 2022. Kinder and first grade won't be left out though! They are working on designing and building their own theme park! We are also working on setting up MakerMart where students will be able to come and get materials to create whatever their imaginations can come up with! The MakerMart is currently being stocked with recycled materials and other fun materials for making and creating.
